TECHNICAL NOTES

Jay Gunkelman, QEEG-D, Editor

The purpose of the Technical Notes section is to provide detailed technical descriptions and illustrations of software, hardware, and techniques within our technically sophisticated field. This section does not have the depth of review that scientific research articles require, though submissions are reviewed for technical accuracy. This column will also contain authors' opinions and value judgments. The personal opinions expressed in the column are exactly that, the opinions and experiences belonging to the individual authors, and these will not be fully peer reviewed or censored.
