EDITORIALS

Welcome to New Editors

The *Journal of Neurotherapy* is pleased to have Tim Tinius, PhD, of St. Cloud State University, St. Cloud, Minnesota join the masthead as Associate Editor. Serving as Consulting Editor, Tim has coordinated and judged student submissions at Society for Neuronal Regulation Annual Scientific Meetings for the last four years. These important papers, done mostly by PhD candidates, have become cornerstones of the meeting and many have subsequently been published in this and other journals. With his focus on publication and academic pursuits, Tim will have an increasingly important role in the day to day operation of the *Journal of Neurotherapy*. Immediately, he will become an action editor, following submitted papers through the peer review and revision process, recommending eventual publication.

We are also pleased to add Juri D. Kropotov, PhD, as Associate Editor representing the European chapter of SNR. Dr. Kropotov is the Director of Laboratory for Neurobiology of Action Programming at the Institute of the Human Brain of the Russian Academy of Sciences. He will help coordinate the editing of submissions by European authors. He

is the author of many papers and the recipient of 12 grants in the last seven years. Dr. Kropotov was named The Eminent Scholar of Russia in 1994, 1998, and 2000 and received a Diploma of the USSR Academy of Sciences for the Highest Achievement (Discovery) in Science, 1990.

In addition to his role as section editor for News from Other Journals and Websites, David A. Kaiser, PhD, of the Rochester Institute of Technology, has agreed to serve in an additional role as Internet Editor, helping the journal editor in the development of a Core List of Relevant Web Site Links, with a view towards assessing sites that merit links to the journal's home page within the Haworth web site. According to Melissa J. Devendorf, Scheduling Manager/Assistant to the Publisher, The Haworth Press, Inc., librarians and users consider it an added value if the journal's printed and e-journal pages provide quality links that can be recommended to the readers. David will continue with the development of new features in the journal involving the subject area of the journal and the internet and continue writing internet-related columns and features for the journal. He will continue to coordinate closely with Brian Thiel, the editor of the Society for Neuronal Regulation's Web services and "Home Page," <www.snr-jnt.org>.

Technical Editors, Rich Herrington, PhD, of the University of North Texas, Denton, Texas and Jon Frederick, PhD, Postdoctoral Fellow at the University of Texas Houston Health Sciences Center join the editorial staff to assist in evaluating increasingly complex issues of statistical analysis and software approaches in neurotherapy. Jay Gunkelman, QEEGT, continues as Technical Notes Editor.
